

Web Developer, Maintenance

Summary

The position is a Web Developer, working on our Ticketing engine and website. It entails a mix of maintenance and customization for our clients, as well as testing and troubleshooting. We are a small development team that is always busy, but still likes to have fun. We enjoy a hard-working, but flexible, relaxed environment and a startup/small company atmosphere. This is a great place to show off your talent!

Requirements

The candidate will have 2 – 5 years of experience, but needs to be extremely sharp with J2EE development.

- Expert knowledge of Java/JSP/J2EE development and maintenance
- Excellent troubleshooting and testing skills
- Experience supporting production database, app and web servers
- Knowledge of SQL/MS SQL Server development, tuning and admin
- Experience in an e-commerce/Internet environment
- Demonstrated ability to design, plan, and execute
- Demonstrated project success with 2 - 5 years exp.
- Highly developed oral and written communications skills

These additional disciplines are also desirable:

- Silverstream development and administration
- Design and development of database reporting
- Windows and Windows Mobile development
- Cryptography, encryption and knowledge of nCipher devices
- Barcode scanning and imaging technology
- Wireless LAN and Wireless WAN implementation

We are looking for a self starter that will make a difference. Only those candidates that are to be interviewed will be contacted.

Note: Re-location is not available for this position.

Note: No sponsorship or H1B situations can be accommodated.
